

LONG YEARS AGO

June 26th, 1904

The machinery for the ash and door factory arrived Monday and men are now busy placing it in position.

Henry Bouck is building a two-story house on his homestead.

Levi Siebert of Siebertville has painted his house.

J.B. O'Connor of Iowa intends to build this fall on his homestead east of town.

A meeting was held June 16th to organize the Didsbury Agricultural Society and the following officers and directors were elected: President, J.B. Shantz; 1st Vice, C. B. Saxsmith; 2nd Vice, D.S. Shantz; Sec. Treas., H.B. Atkins; Directors: A. McNaughton; C. Rennie, M. E. Shantz, T.N. Vance, D.W. Meeker, W. Rupp, E.O. Waite, Theo. Reist, W. Hunsperger, J.C. Stevens, D.M. Stuart, J. Bellamy, Sam Scarlett.

DIDSBURY HOSPITAL BIRTHS

Born at the Didsbury Municipal Hospital to Mr. and Mrs. Henry Leitwiler of Carstairs on Tuesday, June 24, a girl.
To Mr. and Mrs. Jacob Sawatzky on Monday, June 24, a boy.

BEE KEEPERS' DAY AT O.S.A.

A Bee Keepers' Day will be held at the Olds School of Agriculture on Tuesday, July 2nd. The program will commence in the afternoon and the gathering will be addressed by Mr. Le Maître, provincial apiarist.

CALF CLUB FAIR AND SALE AT CARSTAIRS JULY 2

The Carstairs, Olds, West Didsbury and Avondale Junior Beef Feeding Club will hold their annual Calf Club Fair and Sale at the Carstairs Stock Yards on Tuesday, July 2nd. This will be the 4th annual show and sale, sponsored by the Carstairs Board of Trade.

Archie Boyce will be the auctioneer, and it is expected that about seventy calves will be entered in the show and sale.

The stucco job on the Didsbury Pioneer office has been completed and the paint trim is now being added to complete the job started about a year ago. We hope the shop stands out so that our subscribers can see it when looking for the place to pay their subscription arrears.

Jack Edwards, who is working for Jenkins Groceries at Red Deer met his English bride in Calgary Thursday morning, and Mr. and Mrs. Edwards arrived in Didsbury Friday to spend the week end with Mr. and Mrs. Dave Edwards. Mrs. Jack Edwards will visit in Didsbury until accommodation can be secured in Red Deer.

WITH THE GUN CLUB

The Didsbury Gun Club conducted the third shoot of the season last Tuesday evening in McCoy's pasture east of town, and thirteen local members together with three Olds boys were out to try their luck.

Irvin Klein took the honors for the evening, breaking 22 out of the 23 targets shot.
Following is the result of the June 18 shoot, arranged in the order in which the shooters attempted:

SI Armstrong 13; R. Ady 16; L. Berschi 17; E. Rouleau 21; Irvin Klein 22; Ed Watkins 16; Ken McCoy 10; J. Falkman 19; J. Giam 9; A.G. Studer 12; E. Wilkins 16; J. Walden 16; B. Prevost 6; Hawthorne (Olds) 15; Dr. Ramsey (Olds) 14.

Four other enthusiasts ended up the evening's sport with the following results:
Jones (Olds) 6 out of 13; Hawthorne, 7 out of 12; Prevost, 3 out of 12; Armstrong, 10 out of 13.

ANNUAL DISTRICT MEETING ALBERTA FARMERS' UNION AT CROSSFIELD JUNE 28

Just as we go to press Tuesday the evening's sport with the following results:
Jones (Olds) 6 out of 13; Hawthorne, 7 out of 12; Prevost, 3 out of 12; Armstrong, 10 out of 13.

PIANO RECITAL HELD AT UNITED CHURCH THURSDAY

There was a fair crowd at the recital held last Thursday evening in the United Church when pupils of Mrs. Gulliver put on the entertainment. \$12 was collected for the hospital.

Rev. Whyte Smith was chairman of the program.

Those taking part were Florence Gilson, Bennie Gillrie, Viola and Gordon McNaughton, Raymond and Marlene Vipond, Greta Kershaw, Howard and Margaret Robertson, Loretta Reiffenstein, Linda, Marlon and Maxine Hoesgood, Gwen Clark, Geraldine Ford, Emily Dupont, Betty Mortimer, Cameron Wordie, Laura McCoy, Joyce Buhr, Jean Coswell, Bryce Thompson and Douglas Wordie. There was also a violin duet by Bob Hughes and Mary Word.

NOTE—In last week's issue it was inadvertently stated that a previous recital was held in the United church. This recital was held in the Evangelical church.

H. MORGAN ELECTED TO EXECUTIVE OF POSTMASTERS' ASSOCIATION AT CONVENTION

H. Morgan, Didsbury's congenial postmaster, returned last Friday from a three-day convention held in Calgary, and reports an interesting meeting.

Mr. Morgan, a past president of the association, whose photo appeared in Friday's Calgary Albertan, was again elected to the executive of the Alberta branch of the Canadian Postmasters' Association.

JIM CAITHNESS AND DAVE SINCLAIR ENTER HORSES IN CROSSFIELD SPORTS

Jim Caithness and Dave Sinclair entered their horses in the harness races at the Crossfield sports last Wednesday afternoon and both reported an excellent horse racing event. Other entries at Crossfield were Pete McAtee of Calgary and a local entry "Pride of Crossfield."

In the first heat of the race Sinclair was first; Caithness second; and McAtee third.

In the second heat, McAtee was first; Sinclair second; and Caithness third.

In the third heat Sinclair was first; McAtee second; and Caithness third.

The Crossfield entry, a Mr. Miller, won three fourths.

NOTES FROM THE WEST

Word was received from Mr. Ed Parker last week that he had arrived in Simcoe, Ont., to visit his sister, after visiting a brother in Saskatchewan, and the late Mrs. Parker's brother in Saskatoon en route.

Quite a hail storm visited the Elktion district directly after noon on Monday of last week, doing considerable damage to the gardens.

Mr. D. Haener was a Calgary visitor last week.

Mr. and Mrs. O. Thompson were visitors at Provost last week, where they attended the wedding of the latter's sister.

Owing to the wet evening not many attended the picture show at the Hugby hall on Friday evening.

This was the last show of the season, but it is hoped to have them again in the fall.

Mrs. Troyonek who attended her father's funeral, Mr. J. Hoesgood, stayed a few days with her mother before returning to her home in Lethbridge on Tuesday.

Norman Hogg arrived home last week having received his discharge from the RCAF at Vancouver after more than three years overseas.

The constituency convener, Mrs. A.L. Hogg would like to thank all those who helped in any way to make the conference the success it was, especially Dr. Paul and Mrs. Styles, who were the guest speakers, the ladies who so kindly judged the Handicrafts and the young people who gave such wonderful entertainment.

The Elktion Willing Workers met at the home of Mrs. F. Byrt Wednesday last week when a quilt was tied. The next meeting will be July 10th at the home of Mrs. K. Konechuh.

Mr. and Mrs. E. Fisher visited the latter's parents, Mr. and Mrs. F. Byrt, on Thursday.

The two stores in the Elktion district changed hands recently. Mr. H. Erickson taking over the P.O. and Elktion Trading Co., while Messrs. Charlie Byrt and Milt Russell are operating the store formerly owned by Mr. R. Haener.

LOCAL CREAMERY ENTERS BUTTER AT BRANDON FAIR

Mr. J.W. Wordie, manager of the Didsbury branch of Crystal Dairy Limited reports that for the first time since the start of the war they are entering an exhibit of butter in the Provincial Exhibition of Manitoba, being held at Brandon between July 1st and 5th. The local entry was a 14-lb. box of butter, solid pack and we wish the Crystal Dairy every success in the competition.

\$10.00 FOR THE BEST BEARD

Do you want to make an "easy" ten spot? Ten good Canadian dollar bills or a brand new \$10 bill—it makes no difference, but the money will be paid out by Howard Halliday for the best judged beard, grown by anyone in the district (Lions Club members are barred), at the Golden Jubilee Celebration to be held August 14th. So, men, young and old, now is your opportunity to make a little easy money.

Of course we mention that Howard, if eligible, would have had a fair chance for the prize, but from results shown so far he will have to use a bit more of George Law's patent "beard fertilizer" if he intends to set the pace for the winner of that ten spot.

LEAVE CLOTHING AT THE ROSEBUD HOTEL BY SATURDAY NIGHT

Due to the rain Saturday the collection of used clothing in Didsbury for the National Clothing Collection drive, was not completed. Residents of town and district are reminded that the drive ends Saturday, June 29th and those who have used clothing to donate to this worthy cause are asked to bring it to the collection depot at the Rosebud Hotel.

There may be some people who are unable to personally deliver their used clothing to the depot, and in such cases all they need to do is phone the chairman of the local committee, Art Reiber, at 92 and someone will be sent to pick up the articles.

This used clothing is urgently needed to provide wearing apparel for the needy in Europe. Every family is urged to donate at least one article of used clothing to the drive. Do your part. Get your article of clothing to the collection depot without delay.

"STAR CHIEF" OPEN SUNDAY

Fred Reiffenstein will have his garage open on Sunday and Monday, June 30 and July 1st, for the convenience of those wishing to buy gas and oil. On Wednesday afternoon, June 27th, Freeman Co. will be open for business.

HOGG—WILSON

The United Church, Cremona, was the scene of a pretty wedding on June 26th when Miss Hazel M. Wilson became the bride of Mr. Arnold A. Hogg, with the Rev. Pybus of Carstairs officiating. The bride is the elder daughter of Mr. and Mrs. Cliff Wilson of Cremona, and Mrs. Hogg the eldest son of Mr. and Mrs. A.L. Hogg of Didsbury West. Given in marriage by her father the bride wore a gown of white net with veil and orange blossoms and carried pink roses and white carnations. She was attended by her sister, Miss Rita Wilson, attired in pink net, carrying blue lilies. Little Karen Ray, cousin of the bride, was flower girl. Mr. Norman Hogg was best man, and Mr. Gordon Wilson and Mr. Colin Hogg ushers. Mrs. Pybus was at the organ and Miss Rosella Moore sang "Because" during the signing of the register.

A reception for relatives was held in the basement of the church, which was decorated with pink and white streamers and silver bells. The head table being centred by a three-tier wedding cake. Mr. Pybus proposed the toast to the bride and Mr. Arnold Hogg replied. The happy couple were the recipients of many lovely gifts and a telegram of congratulations from Mrs. Colin Hogg, Edinburgh, Scotland.

A wedding dance was held in the Hugby hall the same evening, after which the bridal couple left on the early morning train to spend their honeymoon at the Pacific coast.

MR. AND MRS. R. ADY SELL "BRIGHT SPOT"

Mr. and Mrs. Chas. Stockberger of Hilda, Alta., have purchased the "Bright Spot," Didsbury's popular eating place, from Mr. and Mrs. Russell Ady, and the new owners take over the business on Monday, July 1st.

HARRY RICHARDSON HAS WHEAT 16 INCHES HIGH

Showery weather and high temperatures last week have been ideal for growing grain and hay crops, and wheat, oats and barley in particular have made a remarkable growth lately.

Last week Harry Richardson reported his spring wheat was 16 inches or more in height, and other fields of wheat in the district show even better stands.

With the steady rain again on the week end moisture conditions at this time are adequate, with plenty of reserve to withstand a dry spell, and prospects are bright for an excellent crop this year in the entire Didsbury district.

NOTES FROM THE EAST

The ladies of the Lone Pine W.I. honored Mrs. Earl Woods with a miscellaneous shower at the home of Mrs. Bruce Shells on Wednesday afternoon. There were several visitors present from the Mountain View district. The afternoon was spent in making quilt blocks for the bride. Also compiling a cook book, with each guest writing in her favorite recipe. Mrs. Floyd Ahlgren on behalf of those gathered, presented Mrs. Wood with a large basket of useful and beautiful gifts, and also welcomed her to Canada and to our district.

Mrs. Wood thanked the ladies, saying it was most kind of them to honor a stranger in their midst. The afternoon passed much too quickly and closed with a lovely pot luck lunch, served by the hostess, Mrs. Shells.

Wedding bells have been ringing in the east again. We would like to congratulate Mr. and Mrs. Tom Noble, and Mr. and Mrs. Neil Neufeld, and wish them success and happiness.

Mr. and Mrs. C. H. Gathelone (nee Tina McLean) of Saskatoon, Alberta, were visitors over the week end at the home of her father, Mr. Hugh McLean, and Mrs. Gathelone attended his father's funeral at Castor on their way to Didsbury. They returned to Saskatoon on Sunday.

Dowayne Fobes spent the week end visiting at his home in the district.

OLDS SCHOOL DIV. TO GET SMALLER GRAIN NEXT TWO YEARS

At the regular meeting of the Board of Trustees of the Olds School Division No. 31, held recently in the divisional office at Didsbury, a letter from the Director of School Administration was read which stated the indications are that, under the new School Grants Act, the school grants for 1947 would be reduced by approximately \$2400, and a further reduction of the same amount for the year 1948.

The Board was advised that the town schools are becoming overcrowded and it was therefore decided that all pupils wishing to enrol in schools other than those operated by the Division must apply for permission from the Divisional Board prior to enrolment. Otherwise the Divisional Board will not be responsible for the payment of tuition fees.

It was decided to advertise for tenders for the transportation of pupils of the following areas: Boston district, Hawke and York districts, Elmwood district, Garfield district, Greenwood district, Rodney district, Scotia district, Prairie Valley district, and Melvin district. Contracts to be from one to three years, starting September 1, 1946. Particulars may be secured from the Divisional Office, Didsbury.

It was also decided that the exterior of 15 schools and four teacherages should be painted, and the interior of 10 schools be decorated.

LIONS CLUB AUCTION SALE ON SATURDAY, JUNE 29

All arrangements have been completed for the Didsbury Lions Club auction sale which will be held in town at Jas. Caithness' warehouse on Saturday, June 29th, commencing at one o'clock. Archie Boyce will be the auctioneer, and a large number of donated articles have already been received.

Proceeds of this auction sale will be set aside for the Didsbury Community Swimming Pool fund, and you are reminded that donated articles will be accepted on until sale time on Saturday.

The list of articles so far donated include livestock, machinery and household goods. See posters and advt. for partial list.

More than an inch of rain fell in the Didsbury district Saturday and Sunday. There were showers again Monday and Tuesday.

WORLD HAPPENINGS
BRIEFLY TOLD

Starting June 2 and until August 17 Britain has reverted to the "black-out" because of the fuel shortage.

Skeleton of a Roman baby, which died between 1,000 and 1,500 years ago, has been unearthed at Canterbury, England.

A cargo of 420 tons of Brazilian soap, the first soap to be imported to Italy in several years, arrived recently in Naples.

Fourteen royal families, including those of Emperor Hirohito's three brothers, were looted from the public payroll by Allied order.

The world Zionist congress, due to be held at Jerusalem on Aug. 7, has been postponed until December, it was announced.

Traffic deaths in the United States in April totaled 2,650 or 47 per cent more than in the same month last year, the national safety council reported.

A conference between federal and provincial labor ministers is scheduled for some time in the late summer to discuss the future of labor legislation.

Dr. George K. Bett, first Canadian missionary to return to Japan, is buried in the one-time home of Prince Shimizu in Tokyo, the United Church reported.

A grateful woman customer in northeastern England left £20 (\$85.50) in her will to her butcher, Henry Longman, because he waited on her with "a perpetual smile."

A member of the Royal Canadian Mounted Police at Winnipeg for the past five years, Const. Joseph A. Thomson, 54, has been appointed chief officer at the Canadian embassy in Brussels.

Tiny Hummingbird

Is Said To Be A Most Vigorous Fighter

Not the eagle nor the hawk, but the hummingbird is the most vicious of all the feathered folk.

This mite of a bird, weighing less than an ounce, is the most destructive to members of its own species, according to August P. Abendroth, superintendent of birds at the St. Louis zoo.

Hummingbirds engage each other in death battles in the air, and in feeding grounds, Abendroth explained. They don't quit until one of them is killed.

They are amazing creatures, noted for their speed in flight, which averages 250 miles per hour. Six hundred wing beats a minute—10 per second—make them a hazy blur in the air.

The tremendous amount of energy burned in flight makes it necessary for the bird to eat four times its weight in food daily. They feed almost every five minutes and an hour without food finds them weakened almost to the point of death.

Abendroth pointed out that the wild hummingbirds feed on the nectar of certain plants. They guard the areas where these plants are located with protective ferocity. In captivity, where there is plenty of food for every bird, the instinct to maintain "spheres of influence" remains.

A pitched battle between two hummingbirds is like a fencing duel in the air. Chief weapon is the sharp, needle-like beak and the main defense is swift manoeuvrability. Principal target is the heart, for one quick blow is usually fatal. They will swoop and peck at each other for hours until one is knocked from the air.

Average normal life span for a hummingbird is 2 years and a half. In captivity not more than three are confined to one cage.

There are more than 100 known species of hummingbirds, and their rapid rate of expiration makes the demand for them great, Abendroth said. Zoos pay from \$20 to \$30 each for a bird, and dealers can sell all their supply.

War Orphans

To Build A Village In Switzerland For 4 Orphans

Foundations of a village to shelter 350 orphans from various devastated European countries were laid recently on an 11 acre tract near Trugy, in the mountainous eastern part of Switzerland.

The first 15 dwellings will be built in Swiss farm style, surrounded by gardens and pastures. Three to five houses will be grouped to form a community where the children will be instructed by Swiss and English teachers.

The children's village was named Postelhofen, after the famous Swiss shepherd who died in 1927.

PENSIONERS LIVE LONGER

Statistics kept by the Old Age Pension Board show a gradual increase in the age at which this provision of old age pensioners died. In 1928 the average age at which male pensioners died was 77.68, in 1936 it was 78.52, and in 1944, 79.51. The average age at which female pensioners died in 1928 was 78.55, in 1936 79.49 and in 1944 80.16.—Vancouver News-Herald.

Patsy Rodgers and "Starlight"

CALGARY GIRL WILL BE "MISS CANADA" AT RODEO—Patsy Rodgers is to be "Miss Canada" at this year's famed Madison Square Garden rodeo in October. She has been selected as the first Canadian girl to appear at the New York show during the month-long festival. This daughter of a pioneer family was born in Calgary 21 years ago and spent her childhood on ranches in the foothills of the Rockies. Patsy's mother is one of the noted Hamilton family, who were raised in New Brunswick, sailed by schooner to San Francisco, then followed the overland trail to British Columbia.

Human Rights

Recommended That The Principle Be Adopted By United Nations

Acceptance of the "general principle" that provisions for basic human rights included in international treaties—"particularly peace treaties"—without waiting for an international bill of rights to be written has been recommended by the United Nations economic and social council by its nuclear commission on human rights.

"The drafting 'as soon as possible' of an international bill of rights and its circulation among the governments of the United Nations for comment was urged by the commission. It also asked permission to point out officially to the council 'cases where violation of human rights committed in one country may, by its gravity, its frequency or its systematic nature constitute a threat to the peace'."

The 8,000-word report, one of nine submitted to the council established by the United Nations to promote world welfare, carried a notation in reference to the latter request that Alexander Borovik, the Russian representative, abstained from voting on that point on the grounds he "had not yet been able to study sufficiently the records of the meetings of the commission and the various documents." Mr. Borovik participated only in the later stages of the commission's work and his abstention was one of several by the Russian noted in the report.

Hard to believe? In the question, Health Minister Claxton told The Canadian Press, merely is that of a "possible recipient" of such refugees from the eastern powers, in opposition to Russia, insist need not be compelled to return to their homes against their wishes. And Canada would not be interested until the 7,000 Canadian troops remaining abroad had been brought home, Canada otherwise, the minister added, intervened chiefly in fiscal and unemployment questions.

Believe It Or Not

Soil Scientist Gives Interesting Facts About What We Can Do

Victor H. Ries, in the Country Gentleman, says: "Contrary to popular belief it is not just the moisture from the air that has condensed on the grass and other foliage. Much of it is the excess water taken in by the roots. Since the breathing pores or stomata of the leaves are usually closed at night the water is forced out through the edges."

Then consider these statements by a soil scientist. The loss of moisture by evaporation from the surface of the soil is negligible. And to think of all the energy we have wasted working up dust mulches! The roots of plants need air for they breathe just as both plant leaves and we do. That's why I am always talking about spading in organic matter to aerate the soil. You get root growth if the soil does not occasionally allow the entrance of fresh air. But it should not get so dry that the microscopic root hairs are killed. The famous capillary action that was at one time supposed to bring water from the water table up to the plants can actually raise it but two or three inches in any appreciable amount.

IN SEVENTH PLACE

Britain's best customer in the first quarter of 1946 was South Africa, figures published by the Board of Trade Journal figures showed. India was second, Australia third, France fourth, Egypt fifth, the United States sixth and Canada seventh.

The first steamship to venture to sea without sails or auxiliary power was the Meteor, built in 1852.

Coat Of Arms

Viscount Alexander Had To Use A Blank Seal

Not that anybody would notice it, but the formidable array of documents needed to effect a royal assent for a dozen bills in the Senate Chamber lacked the finish they have in a few weeks.

Only the black-gowned clerks and stiffly-erect aides knew that the Governor's seal on the Royal warrant was a makeshift affair. In fact it was an ordinary barrister's stamp with the impression left on the document merely two blank rings.

The Governor's private seal is needed on the Royal warrant used to appoint the Chief Justice as the Acting Governor to give the Royal assent to bills passed by Parliament.

But Viscount Alexander is a new peer and his coat of arms has not been settled by the College of Heralds in Britain. So he had to use the blank seal of a barrister to make formal the proceedings in the Senate Chamber.

After his arms are approved they will be printed on a special seal by the Royal Mint, here, and will be used thereafter on all such occasions. There is no indication as to the design the Heralds will subscribe for Lord Alexander.

MOTH-PROOF CABLES

Britain's post office is introducing "mothproof" telephone cables in an effort to win the battle against destructive moth grubs among cables in telephone exchanges. Braiding on how cables is impregnated with anti-moth chemicals.

LIFE'S LIKE THAT

By Fred Neher

REG'LAR FELLERS—The Right Viewpoint

HORNEDE CATTLE

Percentage Is Increasing In The Four Western Provinces

All good cattlemen know that horns on commercial cattle are not only a source of damage and loss in the handling and shipping of such cattle, but are an actual danger to the handlers.

The agricultural press have illustrations showing the terrible losses to beef and hog carcasses caused by goring. The employees at every terminal market and packing plant know the mess that can be made by one or two horned cattle shipped loose in a car with other livestock. Many carefully conducted experiments have demonstrated that dehorned cattle fight less, feed together better and gain more than horned cattle. That the rancher, whose main cash crop is cattle, has realized this is evidenced by the fact that on most of the larger ranches of British Columbia, Alberta and Western Saskatchewan dehorning is a standard practice. Yet, as the accompanying figures show, the percentage of horned cattle is increasing in each of the four Western Provinces. Accurate figures for the Eastern Provinces are not available, but there is no reason to doubt that a similar situation exists there.

With dehorning a standard ranch practice, it must be assumed that the increase in horned cattle is coming mainly from the smaller, farm cattle producer. Scarcity of farm labor, scarcity of dehorning and to some extent caustic potash; the fact that many farm operators, lacking a proper dehorning chute, did not feel physically able to wrestle with cattle may have had considerable bearing on the increase in horns.

However, these conditions and scarcities are gradually being corrected. Dehorning are again available—in the West almost every agricultural representative's office has one or more pairs which may be borrowed—dehorning irons, to be heated and used like a branding iron on large calves are now available. Caustic potash is again in supply. The boys are slowly coming back to the farms.

For the farmer dehorning does not represent the same problem as on the ranch. A stick of caustic potash, carried in a small bottle, will do the job easily and painlessly if applied to the nub horns of the calf.

Fancy Horseshoes

Ohio Man Has A Very Fine Collection

If a horseshoe brings luck, Dr. Robert Blair of Lebanon, Ohio, should have more than his share of good fortune.

He is the possessor of 122 of the fanciest, most expertly made horseshoes in the world.

Fashioned of polished steel for race and show horses, the shoes are the handiwork of the late Daniel Harmon Greathouse, considered by some authorities as the greatest smith of all time.

Greathouse challenged smiths the world over to duplicate the quality of the shoes in the collection but no one ever accepted the invitation.

MISSSES HUBBY BY TWO DAYS

Arriving in New York with 292 new brides of U.S. servicemen, Mrs. Lloyd Lader, 23-year-old Polish dancer, missed her husband by two days. He had been ordered to Camp Beale, Calif., for his discharge. Mrs. Lader, who was held in a German concentration camp for a year, was met by an aunt when the liner Brazil docked.

The Chinese Way

Many Customs Regarding Marriage Seen Odd To Western World

Bishop Romanelli of Kweilin tells of a Chinese marriage at which he officiated. The girl was very beautiful and as the good Bishop asked, "Do you take this man to be your lawful wedded husband?" she timidly hung her head. Again the question rang out, "Do you take this man to be your lawful wedded husband?" Still the young girl hung her head in embarrassment. The guests started to titter.

As the bishop formulated the question for the third time, the bride's mother stepped up, grabbed her by the braid and pushed the girl's head up and down in acquiescence. That settled it.

Human Province is noted for its beautiful women. Also, for a rather pointed way of proposing marriage. The farm boy sends the lass of his choice a needle. If she sends the needle back threaded—it means "Yes."

Would you marry someone you had never met? For centuries the Chinese have been doing it. Today, changing habits notwithstanding, they're still doing it in many parts of China. In old-time Chinese families, the bride and groom do not meet until the very night of the wedding.

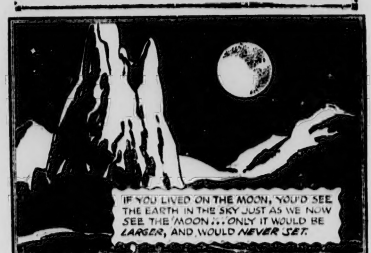

Marriage, they say, is something like a pot of water. It may be cold to start with... but put it on a hot stove and the fire will warm it up. But start with boiling water, and likely as not it will eventually cool off.

A FLORAL CLOCK

SYDNEY, Australia.—At Taronga Park, Sydney's Zoo, is a giant floral clock of 100,000 growing plants. The minute hand is nearly five feet long and is planted, like the hour hand, with moss. Another 100,000 plants grow around the 10 feet wide dial. All seedlings are grown in the Zoo nursery.

48-HOUR WEEK EFFECTIVE JULY 1

The 48-hour week comes into effect in Alberta on July 1st and the Act sets forth some specific clauses regarding employment, both for employees and employers.

Foremost is the clause which states that no employee may work more than 48 hours a week, nor more than nine hours a day. Overtime is only allowed by special permission from the Department and unless this permission is granted no employee may work more than one hour overtime in any one day.

The new Act is being closely studied by retail business men in particular all over the province and some drastic changes are expected in the hours of closing of many business concerns.

Opening at 8 a.m. means that a business place, allowing one hour for lunch, must close at 6 p.m. for five days a week, and at 12 noon on Wednesday. This does not leave any extra hours for Saturday night opening, and the Department has refused to make special consideration to retail business places in this respect.

We understand that a delegation of retail merchants from all towns between Calgary and Red Deer will meet shortly to discuss the problem and it is to be hoped that an amicable agreement can be reached so that uniform hours for workers can be worked out to the mutual benefit of all concerned.

APPLICATION FOR LEASE OF ROAD ALLOWANCE OR SURVEYED HIGHWAY

Notice is hereby given that Walter J. Scheidt, of Didsbury, Alberta, has made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance or surveyed highway, viz.: lying to the west of the S.W. 14-31-15.

Any protest against the granting of the above mentioned lease must be forwarded to the Minister of Public Works, Edmonton, within thirty days from the date of this notice.

Dated at Didsbury, this 25th day of June, 1946.

W. J. SCHEIDT, applicant

People who spend themselves freely are seldom hard up.

Some people are so broad minded everything slips through.

MELVIN NEWS NOTES

The July meeting of the Melvin Red Cross group will be held at the home of Mrs. Albert Schneider, the first Thursday in the month, July 4, instead of the second Thursday as usual, on account of the Calgary Stampede.

Mr. E. Dupont's father arrived in Calgary last Thursday, having obtained passage from France on a merchant ship. Was he ever glad to be back? He hadn't seen an orange or white bread for five years till he boarded ship. The food and clothing situation in France is pitiful. Much worse since the end of the war. They just can't be bought except on the black market. They received one meal a day at the convent. The meal consisted solely of soup—no eggs, meat or potatoes. They have no disinfectants, medicines or soap. Soap sent from relatives here Mr. Dupont gave to the Nuns. In the face of such dire need

surely there is something we can do.

On Monday evening Mr. E. Dupont and daughter Emilie celebrated their birthdays. A few friends were present to wish them many happy returns and a very pleasant evening was spent. A delicious lunch was served including a really decorated birthday cake, bright with candles. Now don't try to be funny! Of course no one was over-coming by the heat.

Mr. and Mrs. Lee Sanderman of Calgary spent last week end at the E. Krueh home.

Last Thursday, June 20, the Melvin school held their closing picnic at the river. The slight sprinkle of rain didn't even mar the dinner and everyone had a grand time. The children enjoyed swimming, races and games and all the ice cream they could eat.

Because of the numerous other activities on July 1st, especially the Cremona shorts and baseball tournament, the A.F.U. have decided to have their picnic two days later. So please note the change of date—July 3 instead of the 1st. Anyone having any influence with the weather man, kindly speak to him in our behalf.

The Melvin baseball team have entered a hard ball tournament at Cremona on July 1st.

The next scheduled game will be played at the home grounds with Oils on June 30.

Miss Lois Brennan of Ontario is visiting at the home of her aunt, Mrs. Elmer Cowitz.

Mrs. Maude Wilkins and Gordon are spending some time at the Johnston home.

Mrs. E. Vetter returned to her home at Sunnyslope last week.

LETTERS TO THE EDITOR

Editor, Didsbury Pioneer:

I desire to take this opportunity of getting a word to the public concerning the liquor problem. It was with interest I noticed in a daily paper some time ago an article with a questionnaire which was distributed to a number of subscribers asking the women to give what in their opinion was man's chief fault, also asking them what was woman's chief fault. The majority of the women answered that men drink too much of alcoholic beverages.

That this is true is evidenced by the report of an almost unbelievable amount of money spent in Alberta in 1945 equalled more than the total of the industry of the provincial economies.

It is also evidenced in many places by drunkenness and by accidents caused by drivers under alcoholic influence.

It is all too common that drinking and drunkenness is looked upon as a joke. It is as easy to make light of it and even to laugh at the acts or speech of one under that influence who doesn't know what he is doing. But was it a joke when a drunken driver was responsible for the injuries sustained to a well beloved doctor of our community and to his property. It surely is no joke but a pathetic tragedy that such cases exist and then the real truth of the cause to remain unpublished.

During my time in H.M. Forces it was evident that drink was responsible for many casualties of which the truth was never revealed.

I appeal to all interested in the liquor business, whether as producer, dealer or consumer, to consider this reference to society which so many otherwise well meaning people are not interested in seeing destroyed. For any other means which are interested in its destruction. Consider with fair judgment and take your stand against it.

JAMES M. HOOPER

WEDDINGS

HALL—WESTFALL

The wedding took place on Saturday evening, June 15, at 7 p.m. at the Nazarene church, Calgary, when Miss Fern Westfall became the bride of Mr. Chester Hall, of Calgary. Rev. E. Lawlor officiated.

The bride, given in marriage by her father, wore an ivory satin gown. Her long veil was held in place with sweetheart roses of which she also carried a shower bouquet.

She was attended by her sisters, the Misses Louise and Pauline Westfall, who wore similar white sheer gowns and carried pink and mauve sweet peas respectively. The groom was attended by his twin brother Wesley.

During the signing of the register Mr. Phil Fraser sang "At Dinning".

The reception was held at the York Hotel.

The happy couple are honeymooning in Banff and other mountain points.

REIST—LOEWEN

On Wednesday afternoon, June 19th, at the M.B.C. church, Miss Ruby Eva Loewen became the bride of Gordon Wayne Reist, son of Mr. and Mrs. Wilmer Reist of Didsbury.

The Rev. D. C. Eby officiated at the service.

The bride wore a gown of white rayon tulle with a floor-length veil and carried a bouquet of red roses.

Miss Betty Reist, sister of the groom, was bridesmaid and wore a gown of pink tulle, carrying a bouquet of roses.

Mr. Robert Luck of Calgary acted as best man, and Gerald and Donald Archer, cousins of the groom, were the ushers.

During the signing of the register the Misses Florence Reist and Marion Eby sang, "Love Never Falteth".

A reception was held immediately after the ceremony at the home of the groom's parents where a delightful buffet luncheon was served to some 40 guests. The bridal table was decorated with pink and white streamers and centered with a three tiered wedding cake beautifully decorated by Mrs. M.K. Snyder.

The happy couple received many beautiful and useful gifts.

They left for Calgary for a few days and on returning will reside in Didsbury.

Out of town guests included Mrs. Barbara Welty and Mrs. Ernest Rauman of Pandora, Ohio; Mrs. Rose Nicholas of Sunnyslope; Mr. and Mrs. Gordon Kaiser, Oils; Mr. and Mrs. McLean and daughter of Calgary.

NEUFELD—LACHMAN

The M.B.C. church was the scene of a very pretty wedding on Wed. June 12, when Gladys Eleanor, youngest daughter of Mr. and Mrs. Wm. Lachman of Alask, Sask., became the bride of Neil Brian Neufeld, son of Mr. and Mrs. C.U. Neufeld and the late Mrs. Neufeld of Didsbury. Rev. C.J. Hallman assisted by the Rev. D.C. Eby, performed the ceremony.

The bride entered the church on the arm of her father, to the strains of the wedding march played by Miss Grayce Frey.

The bride looked lovely in a white floor-length gown with bodice of rayon jersey and skirt of rayon net. She wore a chapel veil and carried a bouquet of red roses.

The only attendant of the bride was Miss Beverly Redfield, who

Get the Loader that GIVES YOU MORE

Get these EXTRAS in convenience, ease of operation, greater usefulness, and economy when YOU buy a loader. When you choose a COATS MECHANICAL LOADER you get all these added features at no more than you'd pay for an ordinary loader!

1. "Miracle" Telescoping Frame, stronger, permits load pickup within few inches of front wheel; puts 30% less weight on front end, less pull on rear axle.
2. Will enter and load in barn or shed with 7 clearance.
3. Load arrangement prohibits frame twist no matter where load is positioned.
4. Tapered wood cone clutch; no slip, no bind.
5. Automatic bucket control; prevents swinging.
6. Finger-tip control; one lever raises, lowers, dumps bucket from driver's seat.
7. Three foot loading clearance.

Fits any row-crop tractor. Hay rack, snow bucket attachments fit loader bucket. Strongest factory guarantee of any loader on the market. Stop in and see this great loader today, or write for free circular and prices!

chose a pink sheer floor-length gown and chapel veil. She carried a bouquet of pink and white sweet-peas.

Mr. Abe Neufeld, brother of the groom, acted as best man, and the Messrs. Don Neufeld, brother of the groom, and Howard Lachman, brother of the bride, were ushers.

During the signing of the register Mrs. Ernie Neufeld, sister-in-law of the groom, sang "Together With Jesus".

Mrs. Wm Lachman, mother of the bride chose for the occasion a blue crepe dress and wore a corsage of pink and white carnations.

A reception to about 50 guests was held at the home of Mr. and Mrs. Ian Stauffer. Mrs. Stauffer is a sister of the bride. A three-tiered wedding cake centered the bride's table and pink and white streamers prettily decorated the room.

The luncheon attendants were the Misses Betty Johnson, Marion Eby and Bonney Hallman.

For travelling the bride chose a navy suit with matching accessories. The happy couple left for a honeymoon at Banff, and then to Alaska, Sask. Upon their return they will reside at Hoadley, Alta. where Mr. Neufeld will resume his duties as pastor.

Their many friends wish them much happiness and success in their future activities in Christian service.

TRY IT ON OUR ROADS!

A railroad in England, it seems, runs what is called a "whitewash special."

It carries no passengers, and every time a bump is hit a splash of whitewash is dropped to mark the place for a repair crew.—The Halifax Herald.

WESTERDALE NOTES

(Too late for last issue)

A meeting of the Westerdale Wil-
ling Workers was held Tuesday last
at the home of Mrs. L. Jones. Roll
call was answered with a "Tribute
to Dad." Final arrangements were
made for the picnic which is to be
held on July 3. At the close of the
meeting a Cookie Contest was held,
and was won by Mrs. Harry Jack-
son.

The July meeting will be held at
the home of Mrs. D. Herbert on
July 9th.

A large crowd attended the barn
dance held at the farm of Mr. and
Mrs. W. Ross last Friday night,
when about \$100 was raised in aid
of the Olds Calf Club. Four draws
were held, and were won by Miss
Moore, Miss J. Whiting, Don Ross
and H. Moore.

Miss Daisy Wigley of Edmonton
spent a few days last week end at
the home of her brother and sister-
in-law, Mr. and Mrs. W. Wigley.

The last National Film Board
picture of the season was held on
Monday night.

Two Western League baseball
games were played Sunday after-
noon when Westerdale journeyed
to Hainstock and were defeated by
a score of 10-4. The Eagle Hill-Water-
side team played at Hartmann and
defeated the Hartmann team 7-0.

"Do you like a brass band?" he
asked, as they were listening to the
music in the park.

"Yes," she said, "a brass band is
very nice, but I think I would ra-
ther have a gold one."

few days.

TASTES DIFFER

Do you like western pictures? If
you don't there are many hundreds
of thousands of moviegoers who do.

Do you like love stories? If you do,
there are many hundreds of thou-
sands who don't. You must always
remember that tastes differ in

movies as well as in clothes, autos
and the other important things that
go to make up our daily lives. Re-
member, we are always trying to
please the biggest majority. We do
this by providing a variety of
movies—dramas, comedies, west-
erns, romances—something for ev-
eryone. Tastes differ . . . and we are
always trying to please YOU—and
YOU—and YOU! — The Didsbury
Opera Theatre.

Mr. and Mrs. W. Shultz left Sun-
day for a two months' vacation
and will visit their son and rela-
tives in Pennsylvania, U.S.A.

Quite a number of men from the
district met at the hall last Mon-
day evening for the A.F.U. meet-
ing.

Mr. and Mrs. G. Tighe spent the
week end in High River visiting
the latter's brother-in-law and sis-
ter, Mr. and Mrs. Richardson.

Don't forget the big Neapolis Co-
Op picnic next Saturday afternoon,
June 29th. Bring the children and
let them have a good time.

There was a little excitement in
the district last week when an air-
plane landed in Tighe's field. The
pilot was looking for Fred Metz'
place and made a mistake in his
directions. After three or four at-
tempts to take off on the soft
ground the pilot managed to raise
the plane with the wind.

Quite a number from the district
took in the Sunday school con-
vention in Olds Sunday.

Miss Mary Knuse is spending a
couple of weeks at her home near
Himby.

BURNSIDE NEWS NOTES

Robert McCulloch returned from
Cessford Oil Fields last week end,
where he had been assisting his
brother, Lewis, in drilling opera-
tions.

Sunnyslope is booming. The coffee
shop is a welcome addition, espe-
cially when having to wait a couple
of hours for much needed repairs
at the garage. Last week Mrs. Sul-
livan proceeded to Calgary to ar-
range for her quota of soft drinks
and ice cream. The red roof of the
new cheese factory stands out pic-
turesquely against the surrounding
green hills and trees, and the hydro
power is within 2½ miles, only the
lack of equipment preventing im-
mediate installation. Many new
houses have gone up, and Bob Mil-
ligan, the Massey Harris agent, is
building a large bow-windowed
show room.

Church of England service will
be held at Burnside school on Sun-
day, June 30th at 3 p.m. At this
service a memorial will be unvel-
led to former pupils of this school
who gave their lives in the Second
Great War.

Mr. and Mrs. W.P. Shultz were
business visitors at Calgary on Sat-
urday.

Capt. and Mrs. Page, Mary, Mike,
Miss Vera Neilson and Mr. and
Mrs. R.J. Page celebrated the Far-
mer's Holiday by attending the
Red Deer stampede on Friday last,
having a most enjoyable time.

Mr. Ralph Long spent the week
end at the home of his friends, Mr.
and Mrs. Alfie Thompson.

Mr. Chris Ehret, whose barn
dance on June 14th was so thor-
oughly enjoyed by all, informs us
he is making arrangements to put
on another dance shortly, which
he hopes will be bigger and better
than the last.

We want need to pray for rain
for some time now, having had a
bountiful supply the last few days.
If the garden stuff grows as fast
as the pretty little weeds a bumper
crop will be assured.

FALLEN TIMBER NOTES

The annual picnic of the Fallen
Timber school will be held on Fri-
day afternoon, June 28th. A good
program of sports is outlined for
the occasion.

It has been reported that Elias
McQuarrie has sold his farm.

Bill Dick has a good stand of
Rye, six feet high and well-headed
out.

A Jeep, a Jeepster, and a Jeepster
have recently been seen on the
"Burma Road."

John Cooper and Alex Moore
made a trip to Calgary last week
end.

A fine, fat Elk was seen in Bear
Valley on Sunday.

Mr. Harry Howton is conducting
the grade nine examinations in the
Fallen Timber school.

Mr. and Mrs. Pie Howe were
Didsbury visitors last week.

Pat Maynes has been taking the
census in this district.

The Fallen Timber School District
has notices up calling for tend-
ers to do the janitor work for the
coming year.

A Loss To The Nation

CONSIDERABLE CONCERN has been expressed here recently over the large numbers of men and women with professional training who are leaving Canada to live permanently in the United States. It is acknowledged that the greater wealth and wider opportunities which are offered by the large and highly industrialized nation to the south of us have already attracted a number of Canadians each year, but these numbers have increased greatly since the war, and have now reached an extent which is regarded by some observers as alarming. The situation has caused the question to be raised here as to why so many of our citizens must seek opportunities in the United States, and as to what effect the exodus of large numbers of engineers, scientists and others trained in our schools and colleges may have upon the future of this country.

Is Essential To Security

The present exodus appears to be largely of those who have scientific training and this may be explained in part by the fact that both the staff and students of American universities were seriously depleted by the compulsory military service regulations during the war. As a result, the number of graduates during the war years was greatly reduced, and this has left the United States with an acute shortage of technically trained personnel to meet the urgent demands of post-war development. The fact remains, however, that those who go from Canada to take up work in the United States, will devote their training and ability to their work there, and their services are lost as far as their own country is concerned. The war has shown the importance of scientific and technical knowledge in the age in which we live, and it is apparent that under present conditions, scientific progress is essential to a nation's security, as well as to its industrial expansion. Under these circumstances, it is understandable that there is concern over the flow of trained Canadian scientists to another country.

One Solution To Problem

Talented Canadians who are attracted to the United States are not only those with scientific and technical training. In music, education, the theatre and many other branches of learning, people of Canadian birth have achieved outstanding success in the United States. It is a matter of regret to many Canadians who are interested in music, the theatre and other forms of art that some of the best talent developed in this country has eventually been attracted by the greater opportunities in their work in the United States. Obviously the only solution to the entire problem is to develop facilities for using the abilities of the men and women who are trained in this country. Don C. J. Macdonald, president of the National Research Council, has urged a national research budget equal to that provided during the war, and in addition, that it be gradually increased until it reaches between forty and fifty million dollars a year. This would not only provide many openings for young scientists but it would further Canada greatly among other nations in the field of science. This, and similar measures, are the solution to the problem as it exists today.

Price Control And Rationing Information

Q.—Will any coupons expire in the month of June?
A.—Butter coupons R1 to R9 inclusive and meat coupons M20 to M39 inclusive will be declared invalid as of June 30.

Q.—Will we be receiving another ration book?
A.—Ration book six will be distributed to consumers the week beginning September 9.

Q.—I recently purchased a summer dress and now find that the material is very poor quality and is also coming apart at the seams. When should I report this to?

A.—You should always make sure that you place in safe keeping the tag which was attached to the article purchased. This tag would state the size, price and give the Wartime Prices and Trade Board license number of the manufacturer's license number. I would suggest that you return your summer dress along with the label to the store from where it was purchased. If you are not satisfied with the store's findings, forward the dress and label to the nearest Wartime Prices and Trade Board office and the Standards Division will investigate for you.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

—
Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

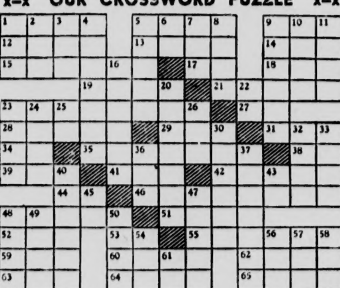

SAYS SISTER IN CONSPIRACY
FRAUD—Winnipeg-born screen actress Donna Durbin has sued her sister, Edith, and the latter's husband, Clarence D. Heckman, stating they conspired with another couple to deprive her of property valued at \$150,000.

MAKES IT EASIER

Others, unlike most wind instruments, demand less than the natural amount of breath, and also players, in long musical passages, have to pause and exhale before inhaling for the next breath.

Answer To Last Week's Puzzle

TASK WILL BE HARD

Racial Tangle Will Complicate Malcolm MacDonald's Job In Malaya

When Mr. Malcolm MacDonald, as Governor-General, settles down to married life in Malaya he will find a vast change in his surroundings from what he was accustomed to in Ottawa. He will be in a tropical country with relatively few white people and a large quarter of a million of Malays, Chinese and Indians. He has to try and make a Malaysian Union of them.

The whole of Malaya is only about the size of England and Wales. In the Straits Settlements which include Singapore, there are twice as many Chinese as Malays; in the Malay states under the Sultans the Malays are in the majority; and in the so-called unfederated states the Chinese again lead.

This is a racial tangle that acutely complicates political affairs. And there is a further headache in that the different races are at different stages of development. The Malays are still largely a primitive people of the forest and rivers. The Indians are shopkeepers and numerically employed. And the Chinese include numbers of educated merchants and manufacturers, particularly in Singapore.

Europeans are now returning from exile or from Japanese imprisonment to take up their pre-war jobs throughout the country which is still under military government. Production and business are slowly recovering from the shock of war. The troops are leaving and soon except for a garrison will all have gone.

"Up country," as it is called, the two main Malay sources of wealth, tin and rubber, are by no means as badly damaged by the war as was at first reported. But labor is hard to get, the rubber plantations have been greatly neglected, and transportation including railway services and shipping is far from what it used to be.

Meanwhile, the Sultans remain dissatisfied with the proposals to incorporate them into a Malaysian Union and presumably one of Mr. MacDonald's first tasks will be to bring them to a more reasonable state of mind.—Ottawa Citizen.

Farm For Veterans

Is Located 45 Miles North Of Swift Current

Nineteen men operating the only Co-operative farm for veterans in Canada have broken 400 acres of rich clay soil and moved nine harrack blocks from a former Royal Canadian Air Force airport to their site in the Matador branch area 45 miles north of Swift Current, Sask.

The goal this year, on the 16 sections of provincially-owned land is to sow 400 to 500 acres of flax. Ploughing is going ahead on a 24-hour basis and by summer's end the co-operators hope to have 2,500 acres broken.

The veterans also have been engaged in clearing seven harrack blocks. Aldwyn's airport, about eight miles north of Swift Current, moving the section to their farm.

Log hitches were used as springs in watches of early times.

"Fire? Goodness, no! Since I've been serving Grape-Nuts Flakes for breakfast, my husband decided the stairs were too slow."
"Would you believe it, I've found tests for muscle, phosphorus for teeth and bones; iron for the blood; and other food essentials."
"Um... may I step in for a bowlful?"
"Certainly—and I want you to try the simply grand marmalade I've just finished making from one of the recipes on the Grape-Nuts Flakes package!"

Care Of Poultry

Basic Principles For Making A Success Of This Industry

The poultry industry in Canada has become big business. It is made up, however, of a multitude of small businesses. It is in the continued success or non-success of these individual businesses that the story of the future will be written, says the Egg and Poultry Market Report, Dominion Department of Agriculture. It is only by the closest attention to the rules of good management that these individual businesses can hope to succeed. The fullest possible utilization of the product of nature is a basic principle in economics and good management.

In poultry management, there are some things often overlooked, such as grass, earthworms, water, air, light, earth and exercise. Grass is the most readily available source of vegetable protein and essential nutrients for poultry, and animal protein is easily obtainable in earthworms. Only one or two species of earthworms may carry poultry parasites. They can be avoided. Water is almost more important than food.

From their peculiar structure, poultry suffer more readily from lack of water than from lack of food. Light is essential especially in the fall and winter. High producing stock needs extra light and extra feeding time to produce well. Concerning earth, there are virtues in good earth and contentment for the birds in a dust bath, and in good poultry management it is a maxim that growing stock should be obliged to range for part of its ration.

There are approximately 2700 pilots in the Royal Air Force of Great Britain.

GEMS OF THOUGHT

HAPPINESS

What happiness is the Bible alone shows clearly and certainly, and points out the way that leads to the attainment of it.—Coleridge.

Happiness is neither within us only, or without us; it is the union of ourselves with God.—Pascal.

The strength and the happiness of a man consists in finding out the way in which God is going, and going in that way, too.—H. W. Beecher.

When mortal man blends his thoughts of existence with the spiritual and works only as God works, he will no longer grope in the dark and cling to earth because he has not tasted heaven.—Mary Baker Eddy.

Happiness in this world, when it comes, comes incidentally. Make it the object of pursuit, and it leads us a wild-goose chase, and is never attained.—Nathaniel Hawthorne.

As we are now living in an eternity, the time to be happy is today.—Grenville Kleiser.

MONEY TO SPEND

Taxi companies are doing a thriving business—thanks to Indians at Montreal Lake, 90 miles west of Prince Albert. Taxi operators report as many as 11 trips a day are made to the village to pick up Indians who want to enjoy a spending spree. The trip costs \$20. Last winter's fur catch, one of the richest on record, is believed to be the source of the Indians' money.

The moon has no light, twilight, no dawn, no sunrises or sunsets, no clouds, fog, winds, rain.

DEPENDABLE and ECONOMICAL

Always ask for BURGESS BATTERY COMPANY

Will Never Grow Up

Doctors Say Life Of Child Bomb Victim Has Stopped

LONDON.—At seven years of age Patricia Gaulton looks no older than 18 months, with bright eyes and rosy cheeks. She never smiles or plays with other children. Her mind and body ceased to grow after her home was hit by a land mine in 1940 and she was buried under rubble for five hours.

"She has never smiled since that day," Patricia's mother said. "Sometimes she makes little noises as though she wants to speak but does not tell me she never will. They say she is incurable."

Patricia never notices anyone around her. Doctors say her life has stopped and she can never grow up.

Some authorities believe that nearly everybody in America will be near-sighted a few centuries hence.

Stop Baby's Sniffles
Mentholatum quickly soothes baby's sniffles, clear head and nose and keeps them clear. Jars and tins, 10¢.

National Parks

Plans For A Five-Year Extension Plan Is Outlined

Broad plans for a five-year extension program for Canada's national parks were outlined to the Senate Tourist Committee by H. A. Gibson, director of the Lands, Parks and Forests Branch of the Resources Department.

He sketched briefly a scheme which would include a national zoological plan, improved facilities in existing parks and creation of new park areas. Senator T. A. Crerar (L. Manitoba), former Resources Minister, said there was need for constant planning in the development of the parks system.

Dr. H. F. Lewis, superintendent of wild life protection, was questioned about the possibilities of a national zoological garden. He said there was need for such a development in Canada. While no site had been definitely recommended the practice in many countries was to establish the garden near the National Capital.

James Smart, controller of the National Parks bureau reporting on a recent survey trip, said the major problem expected this year was to provide accommodation for all the tourists who were expected. R. J. C. Stead, publicity director for the branch, urged a long term publicity program which would both attract tourists and inform Canadians about the value of their own parks.—Ottawa Journal.

WORKS BOTH WAYS

In a Havana office building, a sign over the elevator reads: "Since there is a stairway to the building, the management is not responsible for damages incurred while using the elevator." A sign over the stairs reads: "A sign over the stairs, water in the building for tenants and persons with legitimate business over the second floor, the management is not responsible for damages incurred while using the stairs."

HERE TO STAY

Suggestions that the horse will become obsolete are foolish, Grant MacEwan, professor of animal husbandry at the University of Saskatchewan told the Champion Seed club members of the province. Prof. MacEwan said the horse would continue to be useful in agriculture in spite of mechanization.

Downfalls of the Drowsy!

Restless sleepers frequently suffer the sensation of falling. The drowsy ones these dream-drops have these meanings:

INTO AN ABYSS — Illness
FROM A BRIDGE — Losses
OFF A LADDER — Injuries

Sounds like a hard life, doesn't it? It always is, for people who don't sleep soundly! This may be the result of overstimulation of the nervous system, caused by the caffeine in tea and coffee.

Drink Postum! It's the beverage with a full-bodied flavor all its own! Caffeine-free—contains nothing that can harm the youngest child. You make it right in the cup, with boiling water or hot milk. Costs less than a cent a cup. Enjoyable at any hour! The beverage for the whole family!

Postum
A Product of General Foods

Science Has Proven That Wheat Grains Of Great Antiquity Cannot Be Made To Germinate

(By H. J. Bunker, M.A., F.R.I.C., in the BBC Bulletin)

FROM time to time we read of claims that wheat grains and other seeds recovered from ancient tombs have been planted, and, in spite of great antiquity have grown to produce fine healthy plants. These stories are usually put out in perfectly good faith. A few years ago an Englishman of unimpeachable honesty brought home from Egypt some seeds which were undoubtedly genuine; it was quite certain that they were several thousands of years old. The gentleman had these seeds planted in his garden, and to the amazement of those "in the know" they produced a very fine crop of plants, indistinguishable from modern varieties. On further investigation, however, it was found that the gentleman's gardener thinking it most unlikely that the poor-looking seeds his master had brought home from Egypt would produce much of a show, had planted modern seeds alongside the old, in order, as he said, not to disappoint his master! The deception was certainly well-warranted.

Mummy grains and seeds taken from ancient Egyptian tombs and of undoubted authenticity have, from time to time, been planted under strict scientific supervision, and it can definitely be said that when ever this has been done in no single instance has any of this seed grain ever germinated. Such are the facts, disappointing though they may be.

What, then, are the actual facts regarding the longevity of seeds? Naturally, it varies immensely with different types of seeds, and without going into great detail, I can give you two interesting cases cited by Dr. Rimsbott, keeper of the botanical department at the British Museum of Natural History at South Kensington.

As the result of air-raid damage to the herbarium of the museum in 1940, the seeds of some plants got damp, including a type of *Mimosa* which had been brought home from China in 1763. In spite of their long sleep of 147 years in the herbarium the seeds germinated.

But this is not the record. A seed of the Sacred Lotus plant of the Nile (*Nelumbium speciosum*) was treated with concentrated sulphuric acid and then with water, and in a matter of a few hours it germinated, and is actually growing now at Kew Gardens. This specimen is known to have been collected 237 years ago. This is the longest period of seed viability of which we are absolutely certain. It is true, certain seeds of the same plant taken from peat deposits in Manchuria were germinated, and these deposits were thought to be three to four hundred years old, but we cannot be certain.

We do not know what determines the ultimate length of life of seeds, or why there is any limit to their viability. So far, we only know that the toughest don't normally germinate after two or three hundred years.

Perhaps one of the most interesting tests which has been done on the length of life of seeds or spores was a little experiment which was able to carry out some years back when Tutankhamen's tomb was discovered. It occurred to some of us that here we had a case of a tomb which had definitely not been opened for over 3,000 years, so that we would have an opportunity of seeing whether bacterial spores (which are highly resistant) or indeed any other form of life had managed to survive 3,000 centuries of dormancy.

So when the inner chamber of the tomb, embodying the golden shrines round the royal sarcophagus was opened, sterile swabs which we had sent out from England were wiped on the walls and on various objects in the chamber. They were then sent home to us for bacteriological examination. In every case the contents proved to be sterile. Indeed, the same applied to the various mould fungi and insects which were also found in the tomb; all were dead. The last spark of life had gone out some time during these 3,000 years. So the cold facts of science have shattered these two stories about mummy wheat and disease-producing microbes living on in the tombs of the Pharaohs.

Coronation Seat, Famous Train, Has Gone Back To England

The Coronation seat, crack British train viewed by millions at the New York World's Fair, has gone back to England where it will again be put into passenger service. The locomotive was returned in 1942 for wartime use. The rest of the train was turned over to the American Army which used it at Jeffersonville, Indiana as an officers' headquarters in the Quartermaster Depot there.

MAKING IT SAFE

Petroleum chemists have succeeded in harnessing hydrocarbons into fuel as safe as kerosene, but with combustion properties equal to 100-octane aviation fuel. A lighted match can be dropped into it without it exploding.

New Crystal Palace

Will Be Symbol Of Peace, Prosperity And Industry

The winning design for a new Crystal Palace to replace the famous London, England, landmark that was destroyed by fire in November, 1936, will provide Britain with an unparalleled exhibition, recreational and cultural centre.

The winners of the \$10,000 prize offered for the best design were disclosed the other day to be two Birmingham architects, Herbert Jackson and Reginald Edmunds, who have planned a structure that is intended to be as much a symbol of peace, prosperity and industry as was the first Crystal Palace, erected in Hyde Park for the Exhibition of 1851—but with the difference that the new buildings will not be made of glass but of steel framed, reinforced concrete.

It provides for a main entrance hall, an amphitheatre for opera and ballet and will house a small theatre, concert hall and dance hall. The sports stadium will seat 100,000 persons, and there will also be a swimming pool and an ice hockey and skating rink. Estimated to cost \$60,000,000, the project may be completed in five or six years, architects say.—St. Thomas Times-Journal.

Status Of Women

Have A Definite Role To Play In Uplift Of The World

A sub-committee on the status of women told the United Nations Economic and Social Council that woman has a "definite role" to play in the building of a free, healthy and normal world. She could fulfill this obligation "only as a free and responsible member."

In a report on the functions of the permanent sub-committee, it was established by the council, the nuclear sub-committee recommended that the work be continued until women have reached "equal footing with men in all fields of human enterprise." Attainment of equality in political rights and improvements in civil, educational, social and economic fields were equally important and "should be attacked simultaneously." The sub-committee recommended that "recognition be stimulated in favor of raising the status of women as an instrument to further human rights and peace." It "expects the full collaboration and support of the governments of all the United Nations in their endeavors to raise the status of women throughout the world." It also urged that a United Nations women's conference be called to further the program.

A GIANT TREE FELLED

A dry knur tree of unusual size, estimated to contain enough timber to build five or six average-sized houses, has been felled in the Wapona State forest, in the far north to New Zealand. Forty-seven feet long, the trunk had a girth of 59 feet, and it took four men two whole days to fell the tree with a 12-foot saw.

MRS. JACK MINER CHOWN MOST OUTSTANDING WOMAN IN CANADA—Mrs. Jack Miner, widow of the late Jack Miner, Canadian Naturalist, has been chosen by The Alaska Sports and Wildlife Club "as Canada's most outstanding woman" in Canada for 1946. She married the late Jack Miner some fifty-five years ago and was always active with him in establishing the Jack Miner Bird Sanctuary. She has three sons, namely, Manly P. who is 18 years of age; Ted, who is 17, and Jasper, who is 25. All are active at home carrying on the activities of The Jack Miner Wild Bird refuge. On Mother's Day, Mrs. Jack Miner received the following air mail special delivery letter from The Alaska Sports and Wildlife Club with headquarters at Ketchikan, Alaska. It read:

"Mrs. Jack Miner, you have been chosen as the most outstanding woman in Canada for 1946 by the Alaska Sports and Wildlife Club for your noble work and deeds in wildlife propagation. The principles of wildlife sanctuary which your family founded way back in 1901 has provided food, shelter and safety zone for countless thousands of wild ducks and geese each year. Your ideals are everything that our club stands for, namely, protecting, propagating, increasing and improving the habitat for all wildlife, and co-operation with all associations having similar objectives. Yours truly, Signed by Harry T. Cowan, Vice-Pres., in behalf of Alaska Sports and Wildlife Club."

Pre-Stressed Concrete

Was First Used In War By Canadian Engineers

The Canadian Army overseas was the first to use pre-stressed concrete in military operations. G. Magnel, head of the department of civil engineering at the University of Ghent, Belgium, said in an address to the Quebec branch of the Engineering Institute of Canada.

He said the initial step in the use of pre-stressed concrete in modern warfare was taken by the Canadian Engineering Corps under Maj. Gaston Cole of Sherbrooke, Que., at Ghent in September, 1941, when two beams of pre-stressed concrete were used as a bridge over the Teneuath Canal for pipelines bringing gasoline from Ostend to Ghent.

NOT PERMITTED

Made primarily associated with Nazism or militarism is not permitted in the British zone of occupation in Germany. J. B. Hynd, minister, responsible for British occupation policies in Germany, told the house of commons.

Artificial Breathing

New Technique In Treatment For Tuberculosis Gives Lungs Rest

PHILADELPHIA.—It is possible to disperse with voluntary breathing "for hours at a time," contends Dr. Alvan L. Barach of Columbia University.

Describing a new technique for treating tuberculosis, Dr. Barach told the closing session of the 27th meeting of the American College of Physicians that in the last 10 years the treatment has contributed to the recovery of six out of 12 patients with advanced tuberculosis of both lungs.

Dr. Barach said the patients were treated in enclosed chambers where artificial ventilation of the lungs was substituted for the patient's own breathing.

DRIVEN TO IT

The Kingston Whig-Standard says a fashion authority says that a man takes a drink when depressed but that a woman buys a hat. And after seeing the hat, the man often takes another drink.

Celebrate The Anniversary Of Liberation Of Channel Islands Which Have Been Loyal To Britain

EARLY in May, the Channel Islands, the only part of the British Isles occupied by the Germans, celebrated their anniversary. The German Occupation Forces' Surrender was signed on the destroyer *Bulldog*, but anniversary visitors to the islands included the battleship *King George V* and the cruiser *Delon*.

Assist Norway

Will Use Landing Craft For Post-War Reconstruction

One of the main wartime tasks of British shipbuilders was the building of landing craft for transporting tanks across the sea and landing them during the invasion at difficult points along the coast. The smoothness with which the invasion operations were carried through was ample proof of the suitability of these tank landing craft for this purpose. They are now to be put into service in the interests of reconstruction, for example, in North Norway where many quays and jetties were destroyed by the Germans. In parts Norway the coastline is so inaccessible that normal ships, even under ordinary circumstances, were unable to land. The British Government has declared its readiness to help and the Norwegian Government has just purchased ten of these British tank landing craft. These flat-bottomed boats can be brought right up to the beaches, the bow comes up to form a gangway and the heaviest lorries or other cargoes can be driven off or unloaded on the beach without difficulty. Five of these craft have arrived in Norway and have already been put into service.

Not A Surprise

Man Who Ordered Destruction Of Lidice Expected Death Penalty

Surprise anyone was the sentence of death passed upon Karl Herman Frank, erstwhile Nazi "protector" of Czechoslovakia—a sentence simply put into effect on the gallows.

Least of all was it a surprise to Frank, who heard himself condemned for contributing to the death of at least 300,000 Czechs and above all for ordering the destruction of the village of Lidice, the execution of its men and the extermination of its women and children in retaliation for the assassination of Reinhold Heydrich, another Nazi despot.

Lidice order, but he tried to evade the consequences by seeking to be tried by the International Tribunal at Nuremberg rather than by a Czech court.

"In the whole Czech nation," he said, "there is not a person who would hate me or my enemy. The correctness of that statement is beyond dispute. He did his brutal best to make it so. His execution is punishment in full retaliation."—*Buffalo Courier-Express*.

Disperse Fog

Science Offers The Trick With High Frequency Waves

A new device now being tested at the navy's experimental field at Arvata, Calif., screeches high-frequency supersonic waves at fog—and presto, the fog particles condense into rain, thus clearing visibility.

During the war the British fought with FIDO, a fog disperser which burned high octane gas and took sometimes as much as \$5,000 worth to lay one plane.

The navy has a new disperser, named ELMER, which is expected to do the job for around \$150. But more recently it has been experimenting with sound devices.

The first attempts were made with a battery of sirens and while successful in that these turned fog into rain, the noise nauseated personnel on the field.

Now high-frequency supersonic vibrations with up to 40,000 cycles per second, 150 octaves higher than high C, and completely inaudible to human ears, are being used. These are expected to be still more effective and cheaper as well. *Science Newsletter*.

Glass-Fabric Dyeing

Process Found To Dye Glass In Same Manner As Textiles

Ever since glass-fiber and glass fabric were produced, the need has arisen to dye these glass-substances by similar methods to those employed in ordinary textile dyeing. The great obstacle to the success of these experiments has, of course, been the very nature of the glass which is unsuited to absorb the dyes normally used in textiles. A United Kingdom firm has now been able to overcome all obstacles and develop a process enabling glass to be dyed in the same way as textiles. The great advantage of this epoch-making discovery, is that the dyeing process can be carried out without the necessity of altering existing machinery. The machinery can, therefore, be used alternately for glass-fabric or for ordinary textiles.

For Many Linens

by Alice Brooks.

Something to brag about—linens embroidered with proud peacocks! Varied in size, they look lovely on towels, scarves, tray cloths, pillows. Simple stitching in brilliant colors makes rewarding handwork. Pattern 7297 has triangles of eight peacocks 6 x 11 1/2 to 5 x 8 1/2 inches. To obtain this pattern send twenty cents in coins (stamp cannot be accepted) to Household Arts Department, Winnipeg, Newsworld, Union, Man. Be sure to write plainly your Name, Address and Pattern Number. Our new November issue of the 1946 edition, is yours for only Twenty Cents more—104 illustrations of decorative patterns, embroidery, lace, home decoration, embroidery, and a Free Pattern for three polychrome printed in the book.

MILLION TONS OF RICE

British engineers are building a pontoon ferry across the Bangkok river in Siam as part of an attempt to establish a direct rail link between Singapore and Northern Siam to free 1,000,000 tons of rice from the latter area to famine areas of Malaya and Burma, Major G. N. Russell said.
